

Build digital forms exactly to your needs.

Digitise and customise paper-based forms easily, using a drag and drop interface. Integrate them into your systems seamlessly.

Smart features, built on 20 years of experience, reduces administrative load and delivers higher citizen accessibility and completion rates.

Configure to your requirements

AireForms is packed with hundreds of best-in-class features, for improved accessibility, efficiency, integration and security.

Reduce workload

Limitless customisation options allows your forms to be designed exactly to your needs and workflow, avoiding any additional administrative burden.

Increased engagement

Convenience of 24/7 completions and no lost forms. No login required and packed with best practice patient usability and accessibility features, including translation.

Greater intelligence

With immediate access to data, everyone can make better informed decisions. Data insight tools strengthen reporting and service planning.

Packed with best in class features

Accessibility

- Patients receive a text message with a link to a secure, unique URL.
- No login or registration required.
- Responsive design means forms can be viewed on smartphone, tablets or desktop.
- All major browsers and platforms supported, including Windows, MacOS, iOS and Android platforms listed in the government service manual guidance, and Mozilla, Opera and Chromium.
- Ready-built best-in-class data entry options to choose from or modify, that fit with usability insights and clinical procedures.
- Produce forms in different languages or use in-form logic to switch between different languages.
- Designed in plain English with basic readability.
- Shows patients how far they have progressed through the form.

Efficiency

- Supports both patient and clinician-completed forms, streamlining information capture across care settings.
- Automated invitations and nudge reminders.
- Standardised, validated, symptom scoring tools completed by patients (or family members).
- e-consent ensures patients receive the right information, at the right time.
- Assessment scores calculated in the form, saving valuable clinician time.
- Option to allow two-way SMS and email communication within the form.
- Access completion rates and drop-off points to monitor and improve form completion.

Customisation

There are hundreds of pre-made customisable options for you to pick from for your form. For example:

- Multimedia: include the media input that works for you and your patients, such as text, image, voice and video.
- Auto-population: improve accuracy and completion rates by pulling information from other healthcare systems, for example, the NHS Personal Demographics Service (PDS).
- Output: Once completed, your form can output to a wide variety of formats and channels such as , HL7, FHIR, PDF, and sent via system integrations, HTTP, email or the data is available for query via APIs.
- Integration: Your form can be standalone or integrate with all healthcare systems, and other blocks of the Aire Innovate platform.

Security built in

Our platform is designed to robustly meet GDPR, DCB0129 and EU GMP. We follow globally recognised best practices for information security management and are ISO 27001 certified. Data is hosted on premise or in UK data centres which are also compliant with ISO 27001.
